

JOIN THE REDGRID PRODUCT TRIAL

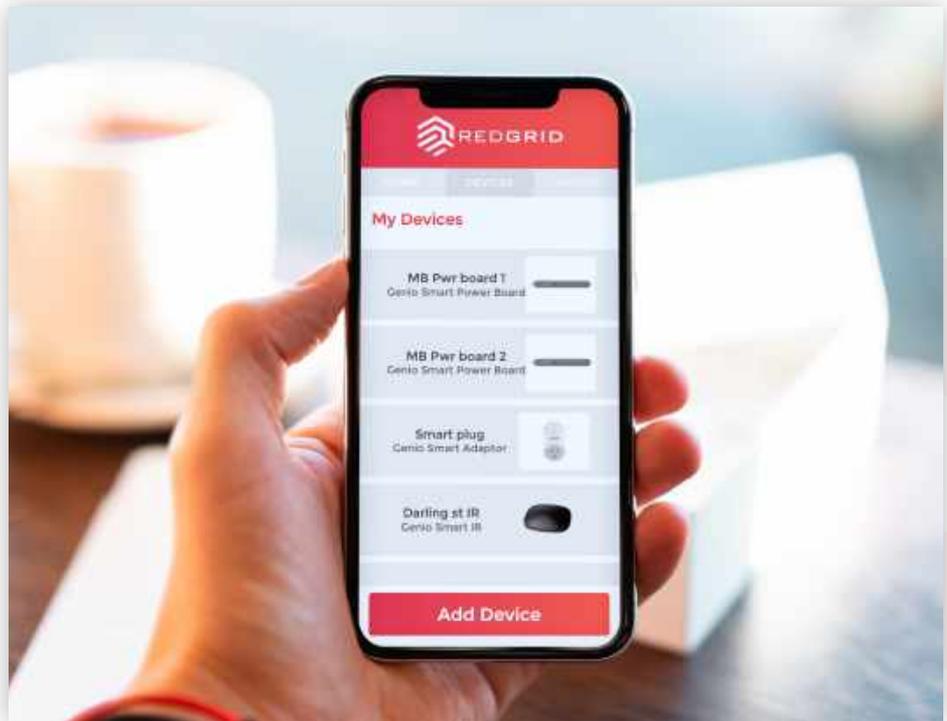

SAVE MONEY, EARN REWARDS

RedGrid is building devices for the home to save you money on your energy bill, and pay you for using your energy during periods that benefit the grid.

It's really simple, these are the devices, and they work with an app

These smart-plugs and controllers connect to your existing appliances at home.

The app then switches your appliances off when you aren't using them to save you money. Also, during high energy usage times in your neighbourhood, RedGrid will pay you for not using select appliances during these periods. These payments will be in the form of rewards including vouchers, cash and donations.

Trial Details

In this trial, we are working to build an application experience that is seamless and saves households as much money as possible. As a user, we want your experience to be easy, with us automatically taking care of your energy in the background. Over the course of the trial, we will be adding new features and updates to make it even better.

Expected benefits of the trial:

-  A free RedGrid smart-home kit (including 3x RedGrid smart plugs)
-  A reduced energy bill
-  Earn rewards by changing energy usage times
-  A better understanding of how much energy and cost your appliances consume
-  Play a key role in shaping new clean energy technology

So what do we need from you?

Our goal is to make the trial as hands-off as possible. Once you plug in your device and connect it to your WiFi, you are good to go. All we need from you is feedback on what you like, what you think could be improved and any features that you think should be added. The trial will go for three 3-month phases, with us adding more features at each phase and you can opt-out at any time.

If you are ready to get started and want to receive your free RedGrid smart-home kit, head to:
